

BETÜL BÜYÜKZENGİN

FRONTEND DEVELOPER

ABOUT

I graduated from Kütahya Dumlupınar University, Department of Computer Engineering. I'm a developer with 2 years of experience in web development. I develop user-friendly, responsive web applications using modern web technologies and frameworks. I'm open to continuous learning and adapting to new technologies.

I use modern web technologies such as React.js and Next.js (App Router). I also have experience in Supabase and REST API integration. I prefer React Tanstack Query for async services. I manage projects with Git and npm. To deploy my projects I use Netlify and Vercel platforms. I create responsive designs for my websites to be compatible on all devices.

EXPERIENCE

INTERN

Dalisto Software Advertising Consulting and Foreign Trade Ltd. Şti. / KONYA

React router	Restful API
Next JS	Firebase
Redux	Supabase
Bootstrap	Vercel
Material UI	Netlify
Shadcn UI	MsSQL
Magic UI	MySQL
Sass	Tanstack query
Tailwind	Styled Components

PROJECTS

THE WILD OASIS NEXT

- React
- Next.JS (App router)
- Tailwind CSS
- Date-fns
- Supabase
- Responsive Design

The Wild Oasis Next is a web application where you can rent a bungalow house for vacation. Guests can access detailed information about the cabins by logging into the application with their Google accounts and they can reserve the cabin they want on the days they want and access their past reservations.
